

Product manual

Quick start guide

1. Open the keyboard's back compartment and retrieve the USB Wireless Receiver.
2. Insert the USB Receiver into your computer/TV's USB port.
3. Slide the POWER SWITCH on the side of the keyboard to ON position.
4. Wait for a small period of time and the keyboard will automatically connect to your device.
5. Start using your wireless keyboard.

Sub-key functions

Press and hold the SHIFT or FN key to access the sub keys listed on each key. Using the Touchpad Tapping once with one finger activates mouse left click. Tapping once with two fingers activates mouse right click. Touching and sliding one finger around the touchpad allows control of the mouse pointer. Tapping twice with one finger activates mouse double-click, and can be used to open files.

How to charge

The wireless keyboard uses a built-in lithium-ion battery. To charge, simply connect the included USB charging cable to the keyboard and directly into your PC/laptop USB port. NOTE: The wireless keyboard comes with a built-in sleep mode to help save battery. If the keyboard has not been used for over 3 minutes, it will automatically enter sleep mode.

Keyboard specifications

- Receiver (dongle): Nano style
- Connect port: With USB2.0 above
- RF mode: 2.4Ghz GFSK
- Transmission distance: Up to 10 meters
- Transmission Power: Less than +4db
- Power supply: Rechargeable 450mAh polymer Lithium-ion battery
- Charging voltage: 4.4V ~ 5.25V
- Charging current: 300mA
- Sleeping Current: 86uA
- Operation Voltage: 3.3V
- Product weight: 210g
- Product Size: 260*83*13.5mm

System Requirements

- HID compatible device
- USB port
- Windows 2000
- Windows XP
- Windows Vista, Windows CE, Windows 7, Windows 8 · Linux (Debian-3.1, Redhat-9.0 Ubuntu-8.10)

Fedora-7.0 tested) - Android OS (With standard USB interface)
